

# GROWTH MODEL MUTUAL FUND PORTFOLIO

August 2017, published on 31 August 2017

This document is a Minimum Disclosure Document (MDD) which contains key information about this Portfolio. This MDD will be updated on a monthly basis. This MDD applies to the un-unitized version of this portfolio available on the **Capital Platforms fund platform, RL360 PIMS, Oracle and Quantum plans**. Other versions on other platforms may be available.

This Portfolio is suitable for investors with a moderately aggressive risk profile who are looking for an active asset allocation solution managed by multiple managers.

## OBJECTIVE

This Portfolio aims to provide investors with medium- to long-term capital growth, **specifically targeting a minimum 7% - 9% net growth, on average, per annum**, while maintaining a moderately aggressive risk profile. It may provide some income but this will not be a primary objective. **The portfolio will target an asset allocation of 70% to risky assets (stocks, commodities, property and alternatives), and 30% to fixed income assets (sovereign bonds, corporate bonds and cash)**

## INVESTMENT STRATEGY

This Portfolio aims to beat the returns of **the composite comprised of funds belonging to Morningstar's USD aggressive allocation category (the average fund)**. The portfolio will implement an international multi-asset strategy, comprising at any one time a 70-30 allocation between risky assets (commodities, property and equities) and fixed income assets (sovereign bonds, corporate bonds, cash). This portfolio holds long-only direct positions and does not implement currency hedging. Accompanying the rigorous macroeconomic top-down analysis approach is a bottom-up security selection process, where funds are screened, shortlisted and selected based on the unique characteristics of the manager's strategy and ability to generate relative risk-adjusted returns (IR).

## RISK / REWARD PROFILE

### MEDIUM TO HIGH

Typically, the lower the risk the lower the potential return and the higher the risk the higher the potential return. There is no guarantee that returns will be higher in a portfolio with a higher risk profile. This portfolio is considered moderately aggressive in terms of risk because there is a 70-30 allocation between stocks, bonds, commodities and cash, including a target volatility range of 5% - 10% pa.

### RISKS

**Market Risk** - Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment.

**Currency/Foreign Exchange Risk** - This risk is associated with investments that are denominated in currencies different from the Portfolio's currency. When these currencies fluctuate against each other the investments face currency gains or losses.

**Concentration Risk** - This Portfolio pools the assets of many investors and uses the proceeds to buy a portfolio of assets. There are regulations in place that limit the amount that may be invested in securities, asset classes and/or companies, thereby spreading the risk.

**Liquidity Risk** - This relates to the ability of the Portfolio to trade out of an investment held in the Portfolio at or near to its face value. This may impact on liquidity and, in the case of foreign investments, on the repatriation of funds.

**Credit Risk** - Credit risk is where an issuer of a non-equity security may not be able to make interest payments and/or capital repayments. This may impact the value of the Portfolio.

**Inflation Risk** - The risk of potential loss in the purchasing power of your investment due to a general increase of consumer prices.

**Political Risk** - The risk that investment returns could suffer as a result of a country's political changes or instability in the country. Instability could come from changes in the country's government, policy makers or military.

**Tax Risk** - This risk relates to any change to tax laws or to the interpretation of existing tax laws which has an impact on the manner in which this Portfolio is taxed.
