

### Objective

This Portfolio aims to provide investors long-term capital growth (>10 years), while maintaining a moderate risk profile. It may provide some income but this will not be a primary objective. The portfolio will target an asset allocation of 50% to risky assets (stocks, commodities, property and alternatives), and 50% to fixed income assets (government bonds, corporate bonds and cash)

### Investment strategy

The portfolio allocates to mutual fund managers who rank superior relative to peers according to the following criteria: 1) strategy and ability to generate risk-adjusted returns (IR). 2) Broad asset allocation mandate 3) Global investment universe 4) Favourable analyst rating (Morningstar research services) 5) Proven history of consistently beating benchmarks.

### Risks

**Market Risk** - Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment.

**Currency/Foreign Exchange Risk** - This risk is associated with investments that are denominated in currencies different from the Portfolio's currency. When these currencies fluctuate against each other the investments face currency gains or losses.

**Concentration Risk** - This Portfolio pools the assets of many investors and uses the proceeds to buy a portfolio of assets. There are regulations in place that limit the amount that may be invested in securities, asset classes and/or companies, thereby spreading the risk.

**Liquidity Risk** - This relates to the ability of the Portfolio to trade out of an investment held in the Portfolio at or near to its face value. This may impact on liquidity and, in the case of foreign investments, on the repatriation of funds.

**Credit Risk** - Credit risk is where an issuer of a non-equity security may not be able to make interest payments and/or capital repayments. This may impact the value of the Portfolio.

**Inflation Risk** - The risk of potential loss in the purchasing power of your investment due to a general increase of consumer prices.

**Political Risk** - The risk that investment returns could suffer as a result of a country's political changes or instability in the country. Instability could come from changes in the country's government, policy makers or military.

**Tax Risk** - This risk relates to any change to tax laws or to the interpretation of existing tax laws which has an impact on the manner in which this Portfolio is taxed.
